Netcoins Investment has helped approximately 3.7 million people and over 500 companies with her ruthless strategies to milk the crypto currency market of all its worth.

. Netcoins Investment company is a company that is based on a decentralized network, in other words, no one loses!

## **HOW NETCOINS INVESTMENT WORKS**

The process of Bitcoin mining at Netcoins investment is an elaborate one, and a deeply controversial one as well. This is the process wherein solving the aforementioned mathematical problems comes into play. In Bitcoin mining, the computer solving this problem is part of what's known as the "proof-of-work system." In this system, the computer attempts to determine a number. The computer that successfully finds the number uses it to hash a block to the previous block in the block-chain network, announces it to the network which validates it, and you are then rewarded with BTC.

It also has made it far less likely of a single person mining a Bitcoin. Bitcoin miners are a dime a dozen today, and an individual will need to spend a lot of money on their computer and an expensive ASIC miner that gives them the best chance of mining BTC. As a result, mining pools such as Netcoins investment, where Bitcoin miners pool their resources together and split the BTC reward among the entire pool, have become more common.

## **WHAT WE OFFER YOU**

- Bitcoin Transparency □ Software Development □ Bitcoin Mining**
- Bitcoin Transaction □ Bitcoin Trust**

### **BITCOIN TRANSPARENCY**

The biggest advantage presented by bitcoin — or to be more precise, the underlying block-chain technology — comes in the form of creating a completely transparent trading system.

### **SOFTWARE DEVELOPMENT**

Bitcoin is free software and any developer can contribute to the project. Everything you need is in the Netcoins repository.

### **BITCOIN MINING**

At Netcoins, we use Today's modern and best bitcoin mining hardware - Application-specific integrated circuit (ASIC) miners have taken over completely. These ASIC machines mine at unprecedented speeds while consuming much less power than FPGA or GPU mining rigs.

### **BITCOIN TRANSACTIONS**

We offer secured transactions; Daily Transaction count is one of the most important and controversial metrics for the Bitcoin Cash (BCH) network. A key driver of the Bitcoin Cash (BCH) fork and the

Segwit (BTC) fork was a dispute over the importance of enabling low-fee on-chain transactions (the type measured by this chart).

## **BITCOIN TRUST**

Our mission is to create an open financial system for the world.  
Want to join our mission? We saved you a seat.
